

Detailed Single Year Tables
Category of Change: Level of Monthly Benefits

Proposed Provision: B3.12. Use an annualized "mini-PIA" formula beginning with retired workers newly eligible in 2030. For each indexed earnings year, compute an individual AIME and an individual PIA. Sum these individual PIAs for the 40 highest years of indexed earnings and divide that total amount by 37 to get the PIA for this provision. Phase-in over five years, meaning that in 2030, 80 percent of the benefit would be based on the old 35-year average PIA formula and 20 percent on the new mini-PIA formula, shifting by 20 percentage points each year until 100 percent is based on the new mini-PIA formula for those attaining age 62 in 2034. Disabled worker benefits are unchanged under this provision.

Year	Proposal			Trust Fund Ratio 1-1-year	Change from Current Law		
	Cost Rate	Income Rate	Annual Balance		Cost Rate	Income Rate	Annual Balance
