Early pension: Age 60 with at least 35 years of coverage (men) or age 55 with at least 30 years of coverage (women).

Deferred pension: There is no deferred pension.

A pensioner receiving a social insurance regular or basic pension must cease work. (Persons insured under the first-pillar social insurance system only receive a regular pension. In the two-pillar system, the first-pillar benefit is the basic pension.)

*Individual account (old-age):* The insured must meet the qualifying conditions for a social insurance pension.

### Disability benefits

Paid for a permanent reduction in, or loss of, the ability to work resulting from an occupational or nonoccupational injury or disease. Higher awards are made for a disability that is the result of a work injury or an occupational disease.

*General disability pension:* The insured must be assessed with a permanent loss of working capacity resulting from permanent changes in health occurring before age 65 (men and women). The insured must have coverage during at least 1/3 of the working life after age 20 (age 23 for insured persons with postsecondary education; age 26 for insured persons with a university degree). There is no minimum qualifying period if the general (full) disability is the result of a work injury or an occupational disease.

The insured must cease employment.

*Occupational (partial) disability pension:* If the disability began after age 50, the pension is paid for a permanent reduction in working capacity greater than 50%; if the disability began before age 50, the pension is paid for a reduced capacity to work that is not likely to be improved by occupational rehabilitation. The pension may be paid up to age 65 (men and women). The insured must have coverage during at least 1/3 of the working life. There is no minimum qualifying period if the disability is the result of a work injury or an occupational disease. If there is no likelihood of rehabilitation for work, the pension is paid for life.

*Occupational rehabilitation and salary compensation:* Paid if the disability began before age 50 and it is likely that the person will regain the capacity to work full time (40 hours a week). Salary compensation is paid in the same amount as the occupational disability pension paid during the rehabilitation process until employment begins in another job with the same employer; if no other job is available with the same employer or acceptable to the insured, it is paid during a 12-month unemployment period after the completion of occupational rehabilitation (24 months if the disability is the result of a work injury or an occupational disease). Other jobs offered in writing must require the same level of education as was required for the job performed before the disability began; if none is available, the job must require the next lower degree of education.

Medical experts of the Croatian Pension Insurance Institute and senior medical experts assess the degree of disability.

The assessment is subject to review by a special medical committee composed of 12 appointed members of the Croatian Pension Insurance Institute.

*Compensation allowance for a physical injury:* Paid for the loss of, or damage to, a part of the body or of an organ that is the result of a work injury or an occupational disease. The insured's injury must be assessed as at least 30%. The allowance is paid regardless of whether the physical injury led to the onset of an assessed disability.

*Individual account (disability):* Paid if the insured meets the qualifying conditions for a social insurance pension and the value of the individual account pension combined with the basic disability pension is greater than the regular disability pension. (In the two-pillar system, the first-pillar benefit is the basic disability pension. Persons insured under the first-pillar social insurance system only receive a regular disability pension.)

### Survivor pension

*Social insurance:* The deceased was a pensioner, an occupational rehabilitation beneficiary, or had completed 5 years of coverage, a 10-year qualifying period, or met the qualifying period conditions for a disability pension. There is no minimum qualifying period if the death resulted from a work injury or an occupational disease.

*Individual account (survivors):* Paid if the deceased met the qualifying conditions for a social insurance pension and the value of the individual account pension combined with the basic survivor pension is greater than the regular survivor pension. (In the two-pillar system, the first-pillar benefit is the basic survivor pension. Survivors of a deceased person insured under the first-pillar social insurance system only receive a regular survivor pension.)

### Old-Age Benefits

#### Old-age pension

Note: Insured persons may be eligible to receive different combinations of social insurance and individual account benefits. For coverage periods under the social insurance system before 2002 and those after 2002 if completed only under the social insurance system, the insured receives a regular old-age pension; for coverage periods completed simultaneously under the social insurance system and the individual account system from 2002, the insured receives a basic old-age pension and a pension from the individual account system.

*Regular old-age pension (social insurance):* The pension is calculated on the basis of the insured's earnings, according to the average wage of all employed persons and the length of the insured's coverage period (including the period before 2002).

The minimum pension is calculated as 0.825% of the adjusted average gross salary of all employees in 1998 for

each year of coverage. For insured persons retiring in 2008, 52.46 kunas is paid for each year of coverage.

The maximum pension depends on the length of the insured's coverage period and previous earnings, up to a ceiling.

**Early pension:** The pension is reduced by 0.15% for each month the pension is taken before the normal retirement age. This reduction is permanent and continues after the recipient reaches the normal retirement age.

**Deferred pension:** There is no deferred pension.

Benefits are payable abroad.

**Benefit adjustment:** Benefits are adjusted every 6 months according to an index based on changes in the cost of living and national average gross earnings.

*Basic old-age pension (social insurance):* For periods of coverage under the social insurance system since 2002, the pension is based on the average gross salary of all employed persons in the preceding year, the insured's number of years of coverage under the new system, and previous earnings up to a ceiling.

Benefits are payable abroad.

**Benefit adjustment:** Benefits are adjusted every 6 months according to an index based on changes in the cost of living and national average gross earnings.

*Individual account:* The pension is based on the accumulated assets in the individual account and average life expectancy at retirement.

Benefits are payable abroad.

### **Permanent Disability Benefits**

#### **Disability pension**

**Note:** The pension depends on the level of wages earned in relation to the average wage of all employed persons, the length of the insured's coverage period (except for a work injury or an occupational disease), and the assessed degree of disability (total loss of, or permanent reduction in, the capacity to work).

In most cases, benefits are paid under social insurance.

For a disability caused by a work injury or an occupational disease, the minimum number of years used for pension calculation purposes is 40. The amount of the pension is calculated according to the insured's years of coverage and the value of the pension per qualifying year.

*General disability pension (social insurance):* The full amount is paid for a general disability.

The minimum pension is calculated as 0.825% of the adjusted average gross salary of all employees in 1998 for each year of coverage. For insured persons retiring in 2008, 52.46 kunas is paid for each year of coverage.

The maximum pension depends on the length of the insured's coverage period and previous earnings, up to a ceiling.

*Occupational (partial) disability pension (social insurance):* The pension is equal to 80% of the general disability pension; 50% if the pensioner is still employed.

The minimum pension is calculated as 0.825% of the adjusted average gross salary of all employees in 1998 for each year of coverage. For insured persons retiring in 2008, 52.46 kunas is paid for each year of coverage.

The maximum pension depends on the length of the insured's coverage period and previous earnings, up to a ceiling.

Benefits are payable abroad.

*Occupational rehabilitation and salary compensation (social insurance):* The benefit is the same as the occupational disability pension unless the disability was caused by a work injury or an occupational disease, in which case it is the same amount as the general disability pension based on 40 years of coverage.

*Compensation allowance for a physical injury (social insurance):* The allowance depends on the assessed degree of physical injury resulting from a work injury or an occupational disease. There is no minimum qualifying period. The allowance is paid to employed and self-employed persons for life.

**Benefit adjustment:** Benefits are adjusted every 6 months according to an index based on changes in the cost of living and national average gross earnings.

*Individual account:* The pension is based on the accumulated assets in the individual account. If the value of the individual account pension combined with the basic disability pension is not greater than the regular disability pension, the funds in the individual account are transferred to the Croatian Pension Insurance Institute, and the social insurance disability pension is paid at a higher rate. (In the two-pillar system, the first-pillar benefit is the basic disability pension. Persons insured under the first-pillar social insurance system only receive a regular disability pension.)

### **Survivor Benefits**

#### **Survivor pension**

*Social insurance:* The amount is based on the old-age or disability pension paid or payable to the deceased and the number of survivors. The minimum number of years of coverage for pension calculation purposes is 21; if the insured's death was the result of a work injury or an occupational disease, the minimum number of years of coverage for pension calculation purposes is 40.

In most cases, benefits are paid under social insurance.

The minimum pension is calculated as 0.825% of the adjusted average gross salary of all employees in 1998 for

each year of coverage. For insured persons who died in 2008, 52.46 kunas is paid for each year of coverage.

The maximum pension depends on the length of the deceased's coverage period, the deceased's previous earnings (up to a ceiling), and on the number of survivors; 100% of the deceased's pension is paid for four survivors or more.

Eligible survivors are a widow(er) aged 50 or older, caring for eligible children, or disabled (a woman who is widowed at age 45 becomes eligible on reaching age 50); and children up to age 15 (age 18 if unemployed, age 26 if a student, no limit if disabled).

In the widow(er) remarries and is younger than age 50 or disabled, the pension ceases.

Benefits are payable abroad.

Benefit adjustment: Benefits are adjusted every 6 months according to an index based on changes in the cost of living and national average gross earnings.

*Individual account:* The pension is based on the accumulated assets in the individual account. If the value of the individual account pension combined with the basic survivor pension is not greater than the regular survivor pension, the funds in the individual account are transferred to the Croatian Pension Insurance Institute, and the social insurance survivor pension is paid at a higher rate. (In the two-pillar system, the first-pillar benefit is the basic survivor pension. Survivors of a deceased person insured under the first-pillar social insurance system only receive a regular survivor pension.)
